### **Detailed Action**

#### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 11-20 and 31-40, drawn to a system for monitoring fly height between a magnetic recording medium and a transducing head, classified in class 360, subclass 103.
  - II. Claims 1-10 and 21-30, drawn to a method for monitoring fly height between a magnetic recording medium and a transducing head, classified in class 356, subclass 507+.

Inventions II and I are related as apparatus and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the apparatus as claimed can be practiced with another materially different apparatus or (2) the apparatus as claimed can be used in a materially different process of using that apparatus. See MPEP § 806.05(h). In the instant case calculating and adjusting magnetic spacing may be done without the use of the claimed apparatus, using a materially different apparatus.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. A telephone call was made to Mr. Walter Duft, (716) 759-1231, on Thursday, May 23, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete

Art Unit: 2627

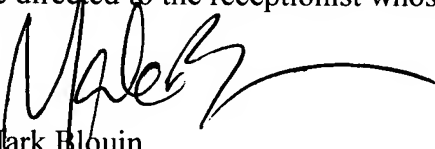

must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Blouin whose telephone number is (571) 272-7583. The examiner can normally be reached M-F, 6:00 am – 3:30 pm.
